

# SPYWOLF

## Security Audit Report

Completed on  
**September 30, 2023**

# OVERVIEW

This audit has been prepared for **Jiggly Puff Inu** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

- SPYWOLF Team -

”

# TABLE OF CONTENTS

# Jiggly Puff Inu

## PROJECT DESCRIPTION

### **According to their whitepaper:**

Evolved version \$JINU High reflection power. Jigglypuff Inu has been designed to reward diamond holders.

With 5% reflection \$JINU rewards and hyper deflationary supply.

**Release Date:** Presale starts in October, 2023

**Category:** Meme token

# CONTRACT INFO

Token Name  
Jigglypuff Inu

Symbol  
JINU

Contract Address  
0xE6883BbDcd0861f30bD2a03dDCC8d4EA95dbe533

Network  
Binance Smart Chain

Language  
Solidity

Deployment Date  
Sep 03, 2023

Contract Type  
Reflection token

Total Supply  
420,000,000,000,000,000

Status  
Not launched

## TAXES

Buy Tax  
**10%**

Sell Tax  
**10%**

\*Taxes cannot be changed in future

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# TOKEN TRANSFERS STATS

Transfer Count	3
Uniq Senders	2
Uniq Receivers	3
Total Amount	840000000000000000 JINU
Median Transfer Amount	303960000000000000 JINU
Average Transfer Amount	280000000000000000 JINU
First transfer date	2023-09-03
Last transfer date	2023-09-29
Days token transferred	2

# SMART CONTRACT STATS

Calls Count	6
External calls	2
Internal calls	4
Transactions count	3
Uniq Callers	2
Days contract called	1
Last transaction time	2023-09-29 10:49:15 UTC
Created	2023-09-29 10:25:31 UTC
Create TX	0xd579da575851df79b16aabdb688c9b2d972edcd67d469c96c39f33bb76943e4a
Creator	0xf13daf03354b1f899df18b5caa65cee207fb1733

# VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

# THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

## High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Medium Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

## Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## ⚠ Medium Risk

Owner can change contract's autoswap settings.  
If swapTokensAtAmount is set to 0 and contract's token balances are 0, contract will halt on sell and selling will fail.

```
function updateSwapTokensAtAmount(uint256 amount) external onlyOwner {
    require(amount <= 1e15, "Cannot set swap threshold amount higher than 1% of tokens");
    swapTokensAtAmount = amount * 10**_decimals;
}

function _transfer(
    address from,
    address to,
    uint256 amount
) private {
    .....
    bool canSwap = balanceOf(address(this)) >= swapTokensAtAmount;
    if (
        !swapping &&
        canSwap &&
        from != pair &&
        !_isExcludedFromFee[from] &&
        !_isExcludedFromFee[to]
    ) {
        swapAndLiquify();
    }
    .....
}

function swapAndLiquify() private lockTheSwap {
    uint256 contractBalance = balanceOf(address(this));
    swapTokensForBNB(contractBalance);
    .....
}
```

- Recommendation:
  - Ensure that swapTokensAtAmount's value is always greater than 1 token (consider decimals).

## Informational

Owner can exclude address from reflections rewards.

```
function excludeFromReward(address account) public onlyOwner {
    require(!_isExcluded[account], "Account is already excluded");
    if (_rOwned[account] > 0) {
        _tOwned[account] = tokenFromReflection(_rOwned[account]);
    }
    _isExcluded[account] = true;
    _excluded.push(account);
}
```

Owner can exclude address from fees.

When address is excluded from fees, the user will receive the whole amount of the bought, sold and/or transferred tokens.

```
function excludeFromFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = true;
}

function bulkExcludeFee(address[] memory accounts, bool state) external onlyOwner {
    for (uint256 i = 0; i < accounts.length; i++) {
        _isExcludedFromFee[accounts[i]] = state;
    }
}
```

Owner can withdraw any tokens from the contract.

When this function is present, in cases tokens sent into the contract by mistake or purposefully, contract's owner can retrieve them.

```
function rescueBNB(uint256 weiAmount) external onlyOwner {
    require(address(this).balance >= weiAmount, "insufficient BNB balance");
    payable(msg.sender).transfer(weiAmount);
}

function rescueAnyBEP20Tokens(address _tokenAddr, address _to, uint256 _amount) public onlyOwner {
    require(_tokenAddr != address(this), "Owner can't claim contract's balance of its own tokens");
    IBEP20(_tokenAddr).transfer(_to, _amount);
}
```

RECOMMENDATIONS FOR

# GOOD PRACTICES

---

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

## Jiggly Puff Inu

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot set a transaction limit
- ✓ The smart contract utilizes "SafeMath" to prevent overflows

The following tokenomics are based on Pinksale's presale page:

- 47.6% - Presale
- 27.6% - Burn
- 23.8% - Liquidity
- 1% - Unlocked

### Tokens distribution

TOKENOMICS

# THE TEAM

⚠ The team is  
anonymous

## KYC INFORMATION

### No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

# WEBSITE

**Website URL**  
<https://jigglypuffinu.io/>

**Domain Registry**  
<https://www.namecheap.com/>

**Domain Expiration**  
2024-05-28

**Technical SEO Test**  
Passed

**Security Test**  
Passed. SSL certificate present

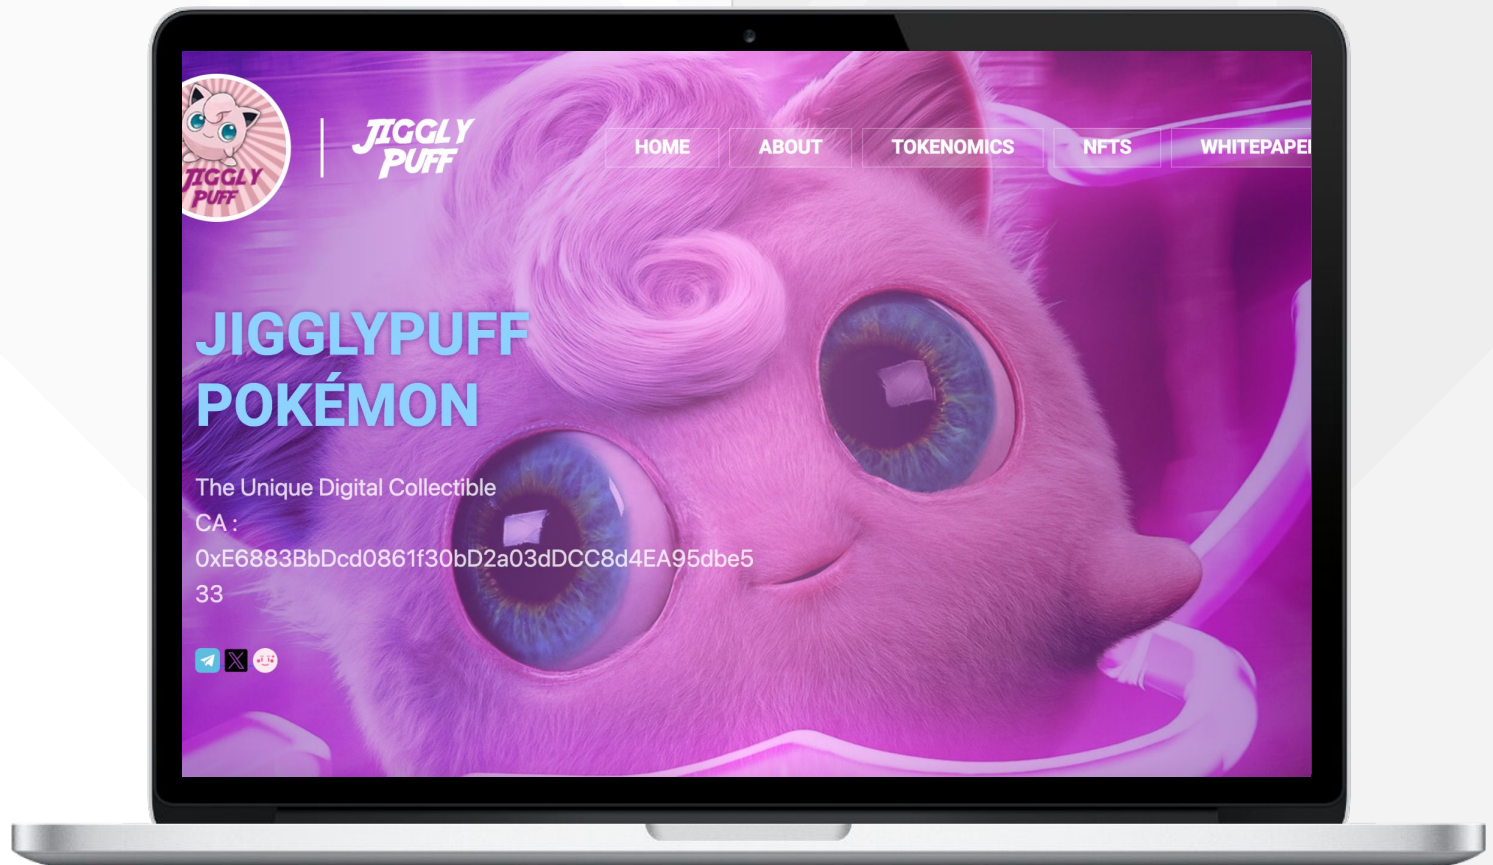

**Design**  
Single page design with appropriate color scheme and graphics.

**Content**  
The information helps new investors understand what the product does right away.  
No grammar mistakes found.

**Whitepaper**  
Yes, explanatory.

**Roadmap**  
Yes, goals set without time frames.

**Mobile-friendly?**  
Yes

# ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

## **DISCLAIMER:**

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
